Pupils learn about the dangers of alcohol

Our pupils are among the first in the UK to participate in a national project that makes them more aware of the dangers of alcohol misuse.

As part of the **Schools Alcohol Awareness Project** pupils tackle a variety of quizzes and puzzles which teach them about the health and social problems caused by the irresponsible use of alcohol.

Topics covered include how alcohol affects the body, alcohol and the law, drinking and driving and the wide variety of dangers which can result for young people who are tempted to misuse alcohol.

The initiative is backed by **BII**, the professional body for the licensed retail sector. **BII** works with its members throughout the UK to promote responsible attitudes to alcohol consumption and retail by generating greater awareness of social and legal responsibilities.

Further information on the **Schools Alcohol Awareness Project** can be found at:
www.schoolsproject.co.uk.
